## BILTMORE FASHION PARK

# MISSION STATEMENT

The retail environment is primarily influenced by two factors: 1) Overall setting (Mall common areas); and 2) Individual components (Tenant storefronts). Both affect the perception of Biltmore Fashion Park as a prime retail establishment.

Generally, storefront design styles are the provenance of the Tenant. The Landlord provides input towards the full development of the design concept, promotes compatibility with adjacent Tenants and common areas, and insures compliance with design criteria.

Criteria applicable to specific areas in the Mall specify certain requirements such as the extent of vertical and horizontal projections, the use of three-dimensional form, and proper material use. These criteria are intended to provide a basis for all storefronts to present merchandise in an exciting, promotional fashion.

All areas exposed to public view are subject to a thorough design review and approval process by the Landlord. Tenants must address storefront and interior design, materials, colors, signage, and lighting. Additionally, specific architectural criteria, applicable to various locations in the Mall, must be met.

These criteria act as a guide for the design of all work by Tenants in conjunction with the provisions of the Tenant's lease with the Landlord. Furthermore, these criteria are subject to revision by the Landlord and the Landlord's interpretation of these criteria is final and governing. All tenants should refer to the Technical Criteria for electrical, mechanical, plumbing and life safety information.

Tenants are encouraged to express their own unique design statement within the parameters of the design criteria as outlined in this manual. The design criteria calls for a three-dimensional storefront that carries into the store sales area and is expressive of the merchandise sold.

National and regional "standard" storefront concepts are respected to the extent that they meet the design criteria. However, tenants should be aware that some concept modifications might be necessary to comply with the Biltmore Fashion Park criteria. The same is true for proposed designs that are overly similar to a neighboring tenant's storefront design. We wish to make the Mall as diverse and interesting as possible and enable each tenant to make a singular statement with their design.

Three-dimensional opportunities afforded by the following criteria to emphasize creative and dynamic forms and designs. Storefront elements shall de-emphasize linear or boxy forms by the use of recesses, angles, curves, gables and material changes in both vertical and horizontal views.
